Saatvik Raghuvanshi

Computer Science Undergraduate | Full-Stack Developer

Jaipur, India | raghuvanshisaatvik@gmail.com | github.com/saatvikraghuvanshi-lab | linkedin.com/in/saatvik-raghuvanshi

Summary

Computer science undergraduate at Manipal University Jaipur who learns by shipping. Eight deployed projects across full-stack web, geospatial interfaces and AI-assisted tools, including an ISRO hackathon mission-planning console. Comfortable owning a product end to end: database schema, API layer, interface and deployment.

Technical Skills

Languages: Java, TypeScript, JavaScript, Python, C, SQL, HTML, CSS

Frontend: React, Next.js, Vite, Tailwind CSS, shadcn/ui, Radix UI, Redux, Motion, MapLibre GL, Leaflet

Backend and Data: Node.js, PostgreSQL, PostGIS, Supabase, Prisma, Convex, Inngest, REST APIs, Gemini API

Cloud and Tooling: Git, GitHub, Vercel, Cloudflare Pages, Google Cloud, Azure, Docker, Linux, CI/CD, Figma, AutoCAD

Experience

Freelance Full-Stack Developer | Independent, Remote | 2026 - Present

- Ship client sites and product demos end to end: frontend, backend, relational schema, deployment on Vercel and Supabase, and the maintenance after launch.
- Built and released VibeBatch, a social personality product with a PostgreSQL schema, row-level security, invite flows and an AI support assistant (live at vibebatch.net).

Cloud Computing and Cybersecurity Intern | Interns Elite, Remote | May 2026 - Jul 2026

- Completed a three-month program across Azure, Docker, CI/CD pipelines, Linux administration and cloud security, applied to deployed workloads rather than slideware.

Projects

OrbitalQuery V2.0 | Earth Observation Console | 2026

Next.js, TypeScript, MapLibre GL, FastAPI, Python, Google Cloud Run

- Built a natural-language console that parses a query, finds Sentinel-2 scenes through STAC and reports quantified land change with per-region NDVI shift.
- Split the pipeline across Next.js routes, the Planetary Computer STAC API and a Python rasterio service on Cloud Run, streaming Cloud Optimized GeoTIFF windows instead of full scenes.

Lunar Ice Intelligence | Mission Planning Console | 2026

Next.js, Prisma, PostgreSQL, Python, Chandrayaan-2 DFSAR

- Built the ISRO Bharatiya Antariksh Hackathon 2026 finalist entry (Problem Statement 8), fusing radar, terrain, hazard and illumination evidence to rank subsurface ice targets.
- Implemented CPR and DOP threshold gating, solar-aware A* traverse routing, and separate measurement, inference and assumption registers.

ShockProof | Household Energy Tariff Guard | 2026

Next.js, Supabase, PostgreSQL, Gemini API, Vercel

- Built meter-photo OCR that extracts readings and projects month-end usage, distance to the next tariff slab, estimated bill and bill risk against Rajasthan tariff data.

Airport Management System | Java Desktop Application | 2026

Java, Swing, JDBC, MySQL, SQL

- Designed a nine-table relational schema with foreign keys and a unique (flight_id, seat_no) constraint against double booking, plus the DAO layer and the full booking, payment, check-in and boarding-pass flow.

Additional Projects | S2C, ResilienceOS, JanSahayak

- Shipped S2C (AI-assisted study-to-card SaaS on Next.js, Supabase and Gemini), designed the ResilienceOS disaster-response interface, and built JanSahayak, a civic-tech AI assistant.

Education

B.Tech, Computer Science and Engineering | Manipal University Jaipur | 2025 - 2029

- Scored 86% in Class 10 (Army Public School) and 82% in Class 12 (Resonance); current GPA 7.0.

Certifications

- Completed Cybersecurity and Cloud Computing (Interns Elite, 2026: Azure, Docker, CI/CD, Linux) and the AI Tools Workshop (be10x, 2026: AI Studio, NotebookLM, Claude, n8n).

Achievements

- Reached the finals of the Bharatiya Antariksh Hackathon 2026 - ISRO Problem Statement 8, Lunar Ice Intelligence.
- Placed 4th at the Startup Forge Ideathon - GCEC Global Foundation, 2025.
- Reached the Top 5 at the Rewind and Recode National Hackathon - JanSahayak, 2025.
- Entered Round 00 of Craft N Code - Cyber Space Club, MUJ x Techfest IIIT Bhubaneswar.
- Entered INDIA RUNS 2026 Ideathon with ShockProof, team Noble Dawn.
- Completed the Robotics Workshop at Techfest IIT Bombay and the WRC Quadcopter Challenge, 2025.
